If an inmate's personal clothing is unfit for storage due to excessive odor or vermin infestation, it will be laundered by laundry personnel. The clothing is sealed in a water-soluble bag and tagged with the inmate's name and JID number. Prior to washing, the tag is removed from the bag and taped to the washing machine. When the clothes have been cleaned they will be placed in a bag with the tag on the outside. The clothing is returned to the property storage room and placed with the inmate's other clothing in a property box.

When medical staff or a deputy orders special clothing/linen for an inmate due to contamination, an MRD shall fill the order and take the required clothing/linen to the pod. Any housed inmate's clothing/linen that has been diagnosed or suspected of contamination is sealed in a water-soluble bag and sent to laundry. Laundry will wash the bag separately so as not to spread any contamination.

Any housed inmate's clothing/linen that has been diagnosed or suspected of contamination with **infectious material** is sealed in a non-permeable red **Medegen** plastic bag and sent to medical for deposit into the medical waste bin which is then disposed of by an approved medical waste contractor. Infectious material is defined as any blood borne pathogen or other potentially infectious material (OPIM) that would release blood or OPIM in a liquid or semi-liquid state if compressed. Universal precautions are to be used in the handling of any clothing/linen during this process.

Male inmates will be issued new razors at wake-up. Each razor will have the inmates name and date written on the razor prior to issue. All razors will be collected by the Deputy prior to breakfast. All used razors will be disposed of in the contraband garbage. Female inmates are issued razors after dinner. Issue will be the same as males and disposed of by the end of shift. At no time will razors be shared by inmates.
